

# Travel Accident Insurance

## Card Benefit Description

Travel Accident Insurance (TAI) provides Visa cardholders and their families with automatic common-carrier accidental death and dismemberment coverage every time they use their Visa card to purchase travel tickets. This coverage provides cardholders with valuable security and peace of mind, as well as an additional reason to use their Visa card for travel-related purchases.

The program provides a minimum of \$100,000 coverage up to a maximum of \$1,000,000.

## How This Card Benefit Program Works

TAI provides common-carrier accidental death and dismemberment coverage when common carrier tickets (airline, rail, bus, cruise line, etc.) are purchased with the covered Visa card.

Full benefits are paid for loss of life, and full or partial benefits are paid for covered injuries resulting in the loss of limbs or eyesight.

In addition, if tickets have been purchased prior to departure to the terminal, coverage is provided to cardholders while traveling to and from the terminal. This includes transportation by taxi, bus, train, airport limousine or other common-carrier conveyance.

## Benefits

TAI offers the following benefits to issuers and cardholders:

### Issuer Benefits

- Value-added service for cardholders
- Potential for increased payment card use and retention

### Cardholder Benefits

- Assistance while traveling
- Ease of use
